Jindal School of Government and Public Policy

cordially invites you to an

Open Lecture

on

**Climate Change: Agriculture and
Forestry have to be Part of the Solution!**

by

Guy Janssen

Governance Adviser and
Political Economist

Abstract

Climate change is probably the most challenging threat to our future. Currently the focus is on reducing the use of carbon fuels. But globally, Greenhouse Gas (GHG) emissions from the land sector (forest, agriculture, grasslands, etc.) account for about a quarter of all emissions. Tackling these emissions can turn the landsector from a problem into a solution. What are the challenges? How can they be solved?

Profile of Speaker

Guy Janssen is a governance adviser and a political economist with more than 25 years of experience in 20 countries. His strength is to align forces that stimulate and sustain change. He works on institutional reform, government process re-engineering, power structures, strategic analysis, incentives, and change management in any field. He has an MPhil in International Political Economy, an MA in International and European Relations, and an MSc in Computer Engineering. Guy has a particular interest in agile planning, open source development and self-organization. He is now dedicated to ensuring that moja global is an open, transparent, responsive, innovative and efficient service provider.
